- ✓ PET FRIENDLY

CE Retreat Course Descriptions

MSDA MEMBER PERKS

FRIDAY

How Dentists Can Become Invincible to Lawsuits & Save Thousands in Taxes

This course teaches proven and effective strategies to prevent and protect against lawsuits, allowing dentists the peace of mind necessary to focus on improved patient care. Tax reduction and estate planning strategies adapted to dentists are also taught. The objectives of this course are teaching you how to maintain focus on improved patient care rather than lawsuit defense, to structure your practice for lawsuit protection and prevention, to reduce your liability insurance costs, and to minimize your taxes.

Larry Oxenham | Author, Senior Advisor
3.0 CE Credits | 9:00 AM - 12:00 PM

Applying the Evidence in Clinical Dentistry: are you adhering to the best practices?

In an era where patients are taking a more active role in their own treatment, there is an increasing need for dentists to have access to the best evidence to make the best decisions to achieve the best outcomes. Evidence-based dentistry is derived from evidence-based medicine, whose founding principles are the best evidence, clinical expertise, & patient values. EBD encourages a dialogue between patients & providers, so patients can share in the decision-making & make their values and preferences known.

Dr. Isabel Rambob | DDS
3.0 CE Credits | 2:00 PM - 5:00 PM

SATURDAY

Incorporating Dental Technologies: Chairside CAD/CAM Restorations, Removable Partial Denture Prosthodontics, & Digital Technology Incorporation

From chairside CAD/CAM materials to incorporating digital technologies into dentistry, our field is consistently changing. In this course, we will discuss chairside CAD/CAM applications and choosing and using the right materials, the use of classic versus alternative philosophies regarding removable partial denture design, and the importance of practicing dentists being familiar with digital technologies in dentistry.

Bryan D. Dye | DDS, MS, FACP, FICD
3.0 CE Credits | 9:00 AM - 12:00 PM

Dental Lasers: Expensive Toys or Essential Tools?

Lasers have been a part of the dental armamentarium for over a quarter of a century. The important question facing the modern dentist is... "Are dental lasers worth the hype or are they just expensive tools that do what I already do with my handpiece and scalpel?" This course will show the advantages of lasers for both the practitioner and the patient. It will give the dentist the information needed to make a financially and clinically sound decision regarding implementing lasers into their practice. All major dental laser wavelengths will be presented and the advantages and disadvantages of each will be discussed. Clinical cases will be presented to show the role of lasers in every discipline of dentistry.

Dr. Steven R. Pohlhaus | DDS, FAGD
3.0 CE Credits | 2:00 PM - 5:00 PM

CE Retreat Registration Form
